

EN 17141 European Standard on Biocontamination Control

NOTE: ENGLISH VERSION (No subtitles are currently available)

An Online Cleanroom Training Course
- Whenever and (or) wherever it suits you!

What is the course "EN 17141 European Standard on Biocontamination Control"?

"EN 17141 European Standard on Biocontamination Control" is an on-demand training course that provides a personal certificate upon completion.

Course objective

The objective of this course is to provide an introduction to the EN 17141 standard. We will cover the purpose of the standard, identify which operations benefit from its implementation, and discuss all the major and general sections of the standard.

Course target group

This course is created for professionals within the pharmaceutical, medical device, healthcare, and food sectors whose work involves microbiological cleanliness and hygiene.

Course language

The course is in English.

Course materials

Course materials (PDF) are included with slides from the course.

Course length

The estimated length of the course is approximately 2 hours, consisting of 90 minutes lecture parts, with multiple-choice questions after each part and finally a short evaluation.

Payment and time to assign/complete the course

You pay for the course licence(s)* by card** or request to pay by invoice. You will get access to the course licence(s) directly after approved payment and you have 90 days to assign the course licence(s) to the course participant(s), after which the course participant(s) has/have additional 90 days to complete the course.

Question?

Please contact us at sales@mcleaned.com

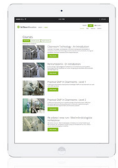

The courses are exclusively sold to legal entities - please see our Terms and conditions, and FAQ for more information.

* 1 course license per course participant and course | ** VISA with Verified by VISA, or MasterCard with MasterCard SecureCode

- Turn for course content

How it works:

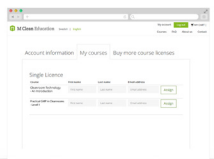

Step 1

Create an account,
select the number of
course licenses you need,
and pay by card
or request to pay by invoice

Step 2

Get instant access
to the course(s) and
complete them when it suits you

Step 3

Download the
personal course certificate
after completing the course

Course content:

Part 1 - Introduction | 17 min

- Standards and guidelines
- Pharmaceuticals and biopharmaceuticals
- Medical devices
- Healthcare
- Food

Part 2 - Structure, terms and definitions | 15 min

- Foreword, introduction and scope
- Normative references, terms and definitions

Part 3 – Establishment of microbiological control | 18 min

- Microbiological contamination control system quality attributes
- Risk assessment
- Establishing an environmental monitoring plan
- Sampling points and sampling frequencies – Action and alert levels
- Establishment of documentation system

Part 4 – Demonstration of microbiological control | 9 min

- Trending of microbiological data
- Verification of the formal microbiological system

Part 5 – Annex A and Annex B | 13 min

- Pharmaceuticals
- Medical devices

Part 6 – Annex C, D, E and Annex F | 15 min

- Healthcare and hospitals
- Food
- Agar based microbiological measurement methods
- Rapid microbiological detection methods – RMM and AMMs
